

AI Crop Assistant ■

Multilingual, Voice-enabled Smart Farming Assistant
Hackathon Presentation

Problem Understanding

Farmers lack quick access to crop disease diagnosis.
Language barriers limit accessibility.
Dependence on experts causes delays.

Innovation & Creativity

Combines image + text input
Multilingual support
Voice output
Government schemes integration

AI Integration

Google Translator → Language AI
gTTS → Speech AI
Rule-based system
Future: ML model

Functionality

Upload image
Enter problem
Get disease, cause, solution
Translation + audio
Schemes

UI/UX Design

2-column layout
Sidebar language
Color-coded results
Farmer-friendly UI

Workflow

Input → Processing → Diagnosis → Translation → Voice

Impact

Helps farmers
Bridges language gap
Instant solutions
Awareness

Future Enhancements

ML model
Offline mode
Chatbot
Weather integration

Thank You

AI Crop Assistant helps farmers make smarter decisions
